**TO:** Parents/Guardians  
**FR:** Bob Wysong, Director of Facilities & Operations  
**DA:** August 2011  
**RE:** Asbestos Reinspection Report Notice

In accordance with the Asbestos Hazard Emergency Response Act of 1986 (AHERA) the facility in which your child is enrolled, has been reinspected and a Management Plan Update developed for the control of any asbestos containing material (ACM) found in the buildings. A certified consulting firm, Tackett Environmental Services, Inc., Beavercreek, Ohio 45434, completed the Reinspection Report and Management Plan Update.

A copy of the Reinspection Report and Management Plan Update is located in the office of the Director of Facilities and Operations for your review.

It is significant to report to you that the buildings in our district have been well maintained in regard to any immediate asbestos program. Our first and foremost goal with asbestos is management control. Management procedures are in effect to control the asbestos exposure. Asbestos has been discovered on the bottom of stainless steel sinks. These areas are non-friable and pose no health hazard except when damaged.

**Mission**

To prepare youths and adults to make informed career choices and to successfully enter, compete, and advance in a changing world.

**Vision**

WCCC is the valued partner of choice within the educational and economic systems of our communities, by providing quality academic and career technical education. We pave the way for a future of opportunities unique to each of our learners.
